

旅

How Ryo Works

Just Ryo it.

The complete picture — every role, every step, end to end.

A WALKTHROUGH OF THE APPLICATION

THE BIG PICTURE

Three roles, one shared loop

Ryo is a stays app with three kinds of people working inside one product. Each has their own journey — and together they form a single, repeating loop that turns an empty home into a great stay.

The life of a single stay, at a glance:

Management & the concierge watch over the whole loop — quietly, the entire time.

ROLE 1 · THE CLIENT

The Guest journey

From a daydream about a trip to checking in and coming home — here's everything a guest does, step by step.

1

Discover

Open Ryo to a clean grid of beautiful homes and browse by category. No sign-in needed to look around.
Home

2

Search & filter

Enter a destination and dates, then narrow by price, guests, and amenities. A map shows where each home sits.
Search

3

Explore a home

Full photo gallery, amenities, house rules, past-guest reviews, and the host's profile — with the total price always in view.
Listing page

4

Book the stay

Pick dates, set the number of guests, and see the full price broken down with nothing hidden.
Booking

5

Pay — held safely

The guest pays and Ryo holds the money until after check-in, so the stay is protected.

Payment is in demo mode today — bookings are real, money doesn't move yet.

Booking · Payments

6

Get ready & arrive

The trip appears under Trips with address, check-in details, and a tap-away concierge if anything's unclear.
Trips · Concierge

7

Stay & get help

During the stay, the 24/7 concierge is on call in the guest's own language to fix anything — not just log it.
Concierge

8

Review & return

After checkout the guest leaves a review, and manages everything — trips, favourites, messages, settings — from their personal hub.
Reviews · Account hub

ROLE 2 · THE HOST

The Host journey

For a host, a home is a small business. Here's how they set it up, welcome guests, and get paid — with Ryo protecting their property and their name throughout.

1

Join & get verified

The host proves who they are and that they own or manage the property. The best homes get an on-site inspection before going live.

Sign-up · Verification

2

Create a listing

Add the home with photos, description, amenities, house rules, and price.

Live today — listings save for real and appear in the feed.

Create listing · My listings

3

Set calendar & pricing

Mark which dates are available, booked, or blocked, and tune nightly pricing.

Calendar

4

Receive a booking

A guest books and the host is notified, with the reservation and a clear payout breakdown.

Bookings · Dashboard

5

Welcome the guest

Chat with the guest before and during the stay to share check-in details and answer questions.

Inbox

6

Host the stay

The guest checks in. If anything comes up, Ryo's team and concierge back the host up.

Bookings · Concierge

7

Get paid

After check-in the held money is released to the host, tracked in a clear earnings view and payout queue.

Earnings · Payouts

8

Reviews & growth

The host responds to reviews and uses the dashboard to see what's working and improve over time.

Reviews · Settings

ROLE 3 · THE MANAGEMENT

The Management journey

Behind the scenes, our own team keeps Ryo safe, fair, and running. This is what turns promises like "verified hosts" and "we'll make it right" into something a guest can truly rely on.

1

Verify & moderate

Check host identities and review new listings before they go live, keeping quality high from day one.

Moderation · Users

2

Oversee activity

A live overview of the whole platform — and the ability to look up any guest, host, or booking and act when needed.

Overview · Search

3

Run the concierge

The 24/7 multilingual support desk answers guests fast and resolves issues during a stay.

Concierge desk

4

Resolve incidents

Handle anything that goes wrong — assign, resolve, communicate, and make the guest whole when needed.

Incidents

5

Manage the money

Track total sales, reconcile payments, release host payouts, and handle refunds and chargebacks.

Finance

6

Protect trust

Suspend bad actors, toggle safety features, and keep a permanent audit log of who did what.

Flags · Audit log

7

Keep it healthy

Monitor the platform so problems are caught early and every release stays smooth.

Health

The life of one stay — all three roles

Here's how the journeys weave together into a single, repeating story. Watch the coloured tags hand off between roles.

- **A home is listed** **HOST**
The host creates a listing with photos, pricing, and rules.
- **It's checked & approved** **TEAM**
Management verifies the host and reviews the listing before it goes live.
- **A guest discovers & books** **GUEST**
They search, fall for the home, pick dates, and confirm with an honest price.
- **Money is held safely** **GUEST** **TEAM**
Ryo holds the payment until after check-in — the safety net for the stay.
- **Host welcomes the guest** **HOST**
They share check-in details and answer questions through the inbox.
- **Concierge stands by** **TEAM**
If anything goes wrong during the stay, support fixes it — fast, in any language.
- **Stay completes, host paid** **HOST**
After check-in, the held money is released to the host.
- **Both leave reviews** **GUEST** **HOST**
Honest, verified reviews help the next guest and lift great hosts.
- **...and the loop repeats**
A better listing, a returning guest, a growing community of trusted homes.

The everyday things, explained

Beyond the big journeys, here are the specific features people ask about — what each one does and how it works.

Create an account

- Sign up in seconds with email (a magic link — no password to remember) or with Google.
- Browsing needs no account; one is only needed to book, save, or message.
- Hosts add a verification step (see "Host a property").

Edit & reset your profile

- Edit your name, photo, languages you speak, preferred currency, and an "about you" bio.
- Reset or change your sign-in any time from Login & security.
- Manage notifications and privacy from the same place.

Account hub · Profile · Settings

Search, location & nearby

- Search by destination, dates, and number of guests.
- Filter by price, property type, and amenities; sort the results.
- A map shows every home in the area — pan, zoom, and explore **what's nearby** or "near me".

Where & when → Filter → Map / nearby

Viewing a property

- Full photo gallery, description, amenities, and house rules.
- Location shown on a map (approximate until booked, for privacy).
- Ratings & reviews, the host's profile, and a price card with a live availability calendar.

Listing page

Ratings & reviews

- **Rate the stay** — the guest reviews the home & host after checkout.
- **Rate the client** — the host reviews the guest, so great guests build a reputation too.
- **Rate the app** — quick in-app feedback so Ryo keeps improving.

Only verified, completed stays can be reviewed — and reviews are moderated.

Messaging & 24/7 support chat

- Guest ↔ host chat before and during the stay, with automatic translation.
- A dedicated **support chat** page connects to the 24/7 concierge in the guest's language.
- A clear "report a problem" path for anything that needs the team.

Inbox · Support / concierge

Payments & payouts

- Guest pays at booking — full price shown up front, in their own currency.
- Ryo holds the money safely until after check-in, then pays the host.
- Refunds follow the home's cancellation policy.

Demo today — real payments & payouts are next.

What you need to host a property

- ✓ Verified identity (ID + selfie)
- ✓ Proof you own or manage the home
- ✓ Property basics: title, type, space, location
- ✓ Clear photos
- ✓ Amenities & house rules
- ✓ Nightly price & availability calendar
- ✓ Agreement to Ryo's hosting standards

Boutique-tier homes also get an on-site inspection.

WHAT POWERS IT

One app, one shared engine

All three roles work inside the same product, fed by one secure, shared store of information — so a guest, a host, and the team always see the same up-to-date picture.

One app, two faces

A phone app and a website, built from the same screens

One shared store

Homes, bookings, messages, reviews — all in one secure place

Built-in security

The right people see and do only the right things

WHERE WE ARE

Built, and close

Working today

- ✓ Guest: browse, search, book, trips, account hub
- ✓ Host: create & manage real listings
- ✓ The full app design across phone & web
- ✓ Live database of starter homes
- ✓ Host & management dashboards (preview)

Coming next

- Real payments & host payouts
- The 24/7 concierge service
- Every host & management action live
- More languages & currencies
- Apps in the App Stores · public website

The hard part — building the app — is largely done. What's left is mostly switching things on.

Just Ryo it.
